MAKING CAMERA SMARTER

**PROTECTING WHAT YOU
CANNOT REPLACE...**

CCTV Doctor is an online diagnostic and AMC service that will not only check all your cameras and DVRs at all your locations every day but will also provide you with comprehensive AMC with one single TAT Pan India. We provide you with a beautiful Dashboard to check all your reports.

SERVICES CCTV Live

MAKING CAMERA SMARTER

**SECURITY.
THERE. NOW.**

As the name suggests, we provide a professional Live Monitoring service to our customers who are looking for Live Monitoring for sensitive areas in their premises. This service may be used to detect pilferage or theft, but it is highly applicable to observe certain specific actions that are extremely critical to any organization & which require immediate action.

SERVICES CCTV Virtual Watch Dog

MAKING CAMERA SMARTER

DON'T BE
THE EASY TARGET!

CCTV Virtual Guard is used for protecting your high-value assets from theft, pilferage, burglary, Vandalism, etc. that too by using your existing CCTV Cameras itself.

How does CCTV Virtual Watchdog work

MAKING CAMERA SMARTER

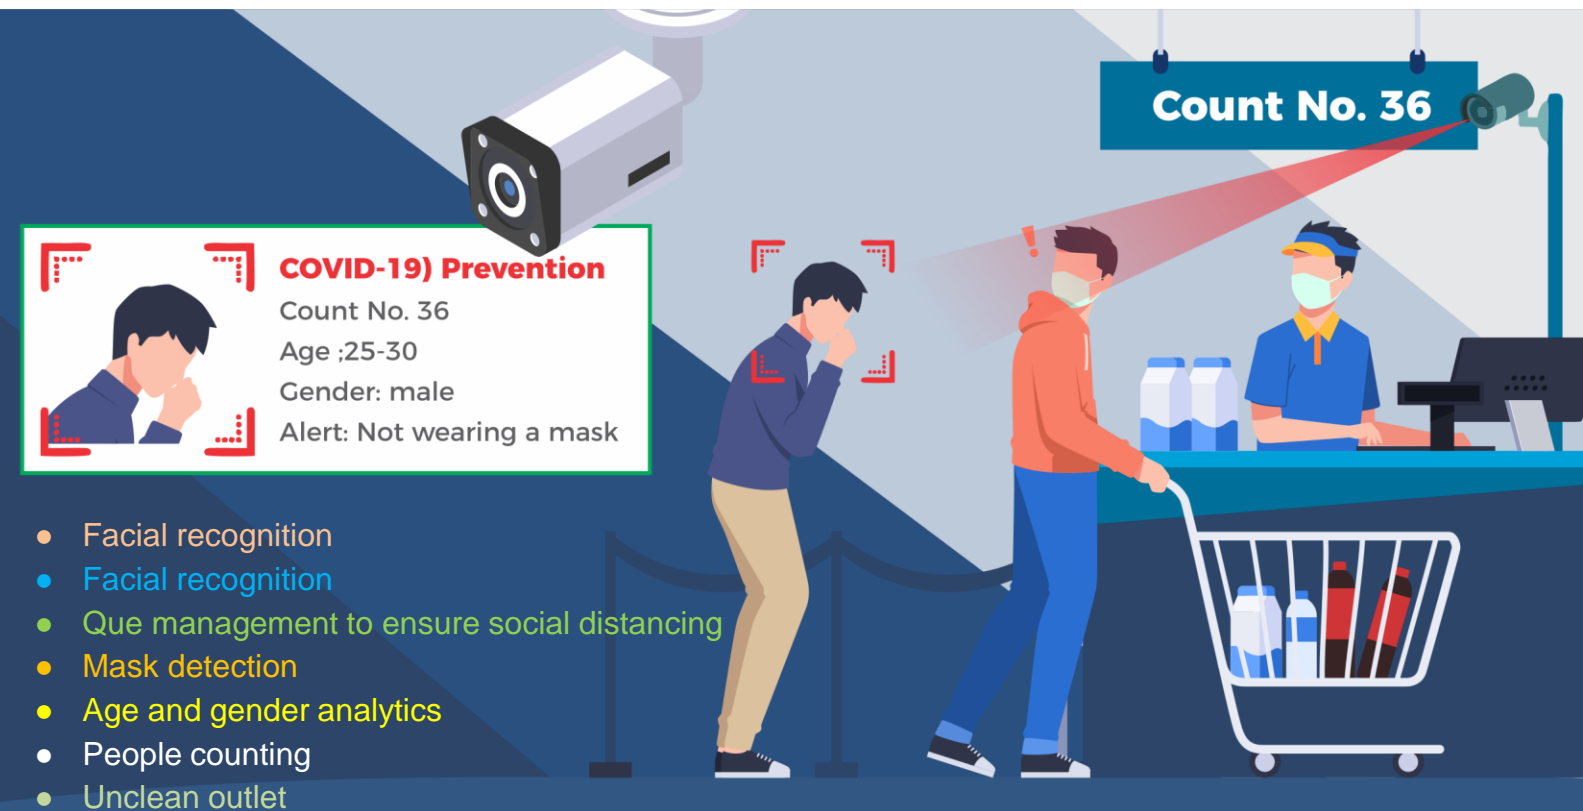

Night Time Intrusion Detection & 24/7 Fire detection & Alert at Store

(Pic for representation purpose only)

- When the Outlet is closed during the night time, during closing hours, system is auto-armed
- If someone, tries to enter the store, with the help of CCTV Cameras & AI based Video Analytics, Human is detected & VC Tech 24/7 Command centre is alerted
- After doing video verification; if the alert is genuine, immediately Siren is activated & also, immediately authorities are alerted on real time basis. Not only that, if customer requires, we can provide 2 way system. If customer requires, we can also alert local government authorities.
- **THUS, THREAT IS DETECTED, DETERRED & ELIMINATED**
- For Fire Alert, will need integration with FAS Panel

WHEN YOU WANT
THE **BEST...**

As the name suggests, Artificial intelligence-based Video Analytics utilizes computer software programs that analyze the images from video surveillance cameras to recognize humans, vehicles, objects, and events & help organizations derive valuable output.
